

UDPL 3-Gun Night Match -

When: **July 23rd. SIGN IN IS 6 p.m., YES, 6 p.m.!**

Where: FARM

Divisions: **3-Gun** or **Pistol Only**.

Round counts:

**3-Gun = Rifle: 39
Pistol: 51
Shotgun: 35 birdshot, 5 SLUGS**

Pistol Only: 130

Notes:

I designed this match with tactics in mind over speed. **Timers will not be used.**

When you are ready, the SO will say, 'go', and when the shooter is finished, IDPA safety/unloading guidelines and procedures will be used. The scoring will be **"points down only"** and **all targets will only require one Neutralizing hit. ALL stages are Vickers**, so taking multiple shots is encouraged. Bring extra ammo than the above numbers.

Yes, it is very likely and possible that we could have multiple "winners" with total scores of "Zero". There will be procedural penalties for not using cover and, in certain stages, not shooting in tactical priority- or slicing the pie. These will be at the discretion of the SO, and the SO will not be required to call out "cover!" to the shooter and wait for compliance. Cover = 50% torso.

Because timers will not be used, weapon divisions, like our traditional UDPL 3-Gun matches, won't apply.

A shooter with a 2 D-cell plastic Wal-Mart special, a 5 round shotgun, a revolver, and a bolt action rifle will be on par with "Tactical Travis" \$5,000 worth of night-fighting nifty do-dahs. Remember, it will be the hits in the down zero zone and avoidance of procedurals and failure-to-neutralize penalties that will keep your score at zero. So please come out and perhaps bring guns that you've been afraid to shoot at a match.

Besides bringing your Surefires and the like, bring inexpensive small AA battery flashlights for administrative work, like lighting up scoresheets and taping targets.

I would like to start shooting at a little before 7 p.m., hence the sign in at 6 p.m. realize that there is still 2 1/2 hours of light starting at 7, however, I am getting up there in years and I want to go home before 2 a.m., so I figured that if we shoot half the match in light and the last half in dusk/dark, that would still be pretty darn fun. I have 9 stages and 2 strings each, but as you see from the round counts, it should go quickly.

Thanks again for letting me serve as your 3-Gun Match Director. I have a helluva great time shooting 3-gun and I hope you all do to.
