

## UDPL Man-On-Man Match Information

A special **Man-On-Man** event will be held on **Saturday, July 14<sup>th</sup>**. For those who don't know what this is, please see the video link of the 2011 MGM Grand Nationals finals <http://www.youtube.com/watch?v=41sqBB4hCWk>

This will be a double-elimination event and we will be using a handicap system to match shooters of different skill levels, so don't be worried that you won't have a chance. **Space is limited to 60 shooters**, but **there are currently plenty of slots still available**. **BE SURE YOU REGISTER FOR THE MATCH AT [www.udplevents.net](http://www.udplevents.net)**.

As this is a special event, we have decided to charge **\$10.00 for each shooter, UDPL member or not, Jr., Lady, etc.** That being the case, we make a special plea to all shooters to **please bring the exact fee** so we will not need to worry about making change for everyone.

### General Info:

- Caliber Requirement – it must be able to knock down the Plate Rack plates and other poppers
- A strong side holster and several magazines as this match moves very fast

### Division Info:

- There will be only two divisions - **Open** and **HiCap/Limited**
- Three squads will be running at the same time in Corral 1, 2 and 3, each one matching people of similar skill levels
- Hopefully all who signed up will have put down their class (IDPA - MA, EX, SS, MM, NV) (ICORE - "GM", "M", "A", "B", "C", "D", "U") (USPSA - "GM", "M", "A", "B", "C", "D", "U") or unclassified if that is the case on their registration
- Each shooter will be squaded according to the above
- Each squad will shoot all three stages
- The First and second place shooters from each squad will meet in a shoot-off to produce the overall Grand Champion of the match

### Handicap Info:

It is the same system that is used in the Man-On-Man Nationals in Idaho and works like this – There will be one plate put down per class separation. An example would be when an Expert shooter faces a Marksman, the Marksman would have two plate's put down before the start signal. There will be one plate put down to match gun divisions. An example would be if an Open shooter faces a HiCap/Limited shooter, the HiCap/Limited shooter would have one plate put down before the start signal. There is a maximum of 3 plates put down at any one time.
