

From the Man-On-Man Match Director –

Question from some shooters: “**Why do the results show that I didn’t receive any points?**”

That is a good question and one that needs to be answered so everyone understands.

Points are earned only on the right side of the bracket. The left side (double elimination part) does not earn any points. Not all of the score keepers were aware of this and were tracking the points on the left side.

The winner on the left side comes up to face the loser of the final matchup on the right side and to shoot for 2nd place on the stage. Some shooters may have shot fairly well on the left side but did not win a bout on the right and didn’t make it to the end to come around and face the other side.

There are a few bugs to work out with the handicap system - mostly a way to rank shooters that have not classified yet. Several of us meet after the match to break it down as to what went right and what didn’t. We have some things to implement if we decide to do this again.
