

UDPL March 26th IDPA Classifier Match Announcement

Note that even though this is an IDPA match, **everyone is more than welcome to come and shoot the match.** However, **only those who are current IDPA members, or those shooters who join the IDPA at the match, will be able to shoot the match for IDPA classification.** All others will be placed in the appropriate Division, but will be listed as DIV-NFC (**Not For Classification**) in the results.

Where: The FARM

When: Saturday, March 26th - sign in 8 a.m.

What to bring:

Pistol: **90 rounds**

This round count is the **absolute minimum – you will probably need more.**

Misc. Information:

The IDPA Classifier is to be shot as a continuous 90-round match to determine in what official division a shooter will compete. If, for some reason, you need to re-shoot a stage, you will need to re-shoot all strings of that stage, not just the string you had a problem with. That is why you may need additional ammo.

Because the IDPA Classifier is designed to determine the basic gun-handling skills of a shooter, none of the stages are required to be shot from concealment.

As in the past, there will be six areas of the FARM that will be set up for the Classifier – two areas each for each of the three stages that are part of the Classifier match. In this way, we can equitably process all shooters who wish to compete.

Specifics:

Be aware that this match will be **conducted under the “old” IDPA equipment rules** as the new rules do not become effective until April 15th, however, revolver shooters that classified in the Stock Service Revolver (**SSR**) Division and did so using a moon-clip gun, can use this match to re-classify in the new Enhanced Service Revolver (**ESR**) Division.

To review the specific stage and string descriptions and requirements of the Classifier, see the Classifier Information on the UDPL Web site: <http://www.udpl.net/downloads/index.html>

If you have any questions, please let me know.
